Adding your cPanel email to Spark

Step 1: Download **Spark** from the App Store.

Step 2: Open the **Spark** app. Once you get through the help screens you will be brought to the **Add Email Account** page.

Step 3: Enter your email address and click **Next**.

Step 4: On the next screen enter the password for your email account.

Step 5: Click **Additional Settings.**

Step 6: You will be asked to fill out the following information with the correct information for your specific email address.

Email: youremail@yourdomainname.com
Incoming Mail Server (IMAP)
Username: youremail@yourdomainname.com
Password: your email account's password.
Server: zeb.zebralovehost.com
Port: 993
Security: Make sure **SSL** is selected.
Outgoing Mail Server (SMTP)
Username: youremail@yourdomainname.com
**Password:** your email account's password.
Server: zeb.zebralovehost.com
Port: 465
Security: Make sure **SSL** is selected.
Step 7: Click **Sign in.**

*The system will now verify your email account.
