Adding your cPanel email to Gmail Fetch *WE DO NOT RECOMMEND, HAS KNOWN ERRORS

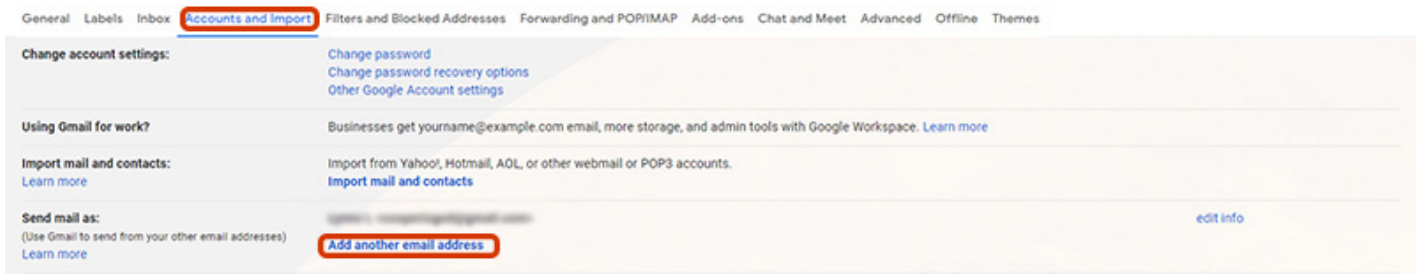

Sending Email Using Your Email Address

Step 1: Open Settings

Step 2: Click on See all settings

Step 3: Click Accounts and Import

Step 4: Under the section labeled Send mail as: click Add another email address

Step 5: A pop-up window will appear (*If you have pop-ups blocked on your browser you may have to allow it*)

Step 6: You will be asked to fill out the following information with the correct information for your specific email address.

Name: Whatever name you would like to appear on emails.

Email Address: youremail@yourdomain-name.com

Leave Treat as an alias. checked.

Step 7: Click Next Step

Add another email address you own

Enter information about your other email address.
(your name and email address will be shown on mail you send)

Name:

Email address:

Treat as an alias. [Learn more](#)
[Specify a different "reply-to" address](#) (optional)

Step 8: Next you will be asked to fill out the following information with the correct information for your specific email address.

SMTP Sever: zeb.zebralovehost.com

Port: 587

Username: youremail@yourdomainname.com

Password: your email account's password.

Leave **Secured connection using TLS (recommended)** checked.

Step 10: Click **Add Account**

Add another email address you own

Send mail through your SMTP server

Configure your mail to be sent through zebraLovewebsolutions.com SMTP servers [Learn more](#)

SMTP Server: Port:

Username:

Password:

Secured connection using [TLS \(recommended\)](#)

Secured connection using [SSL](#)

Step 11: If everything goes to plan you should see the **Confirm verification and add your email address** screen.

Add another email address you own

Confirm verification and add your email address

Congratulations, we successfully located your other server and verified your credentials. Just one more step!

An email with a confirmation code was sent to info@zebralovewebsolutions.com. [\[Resend email\]](#)

To add your email address, do one of the following:

Click on the link in the confirmation email

OR

Enter and verify the confirmation code

[Close window](#)

Step 12: You will then have to log into your email through WebMail to get the verification code that was sent to you. Copy and paste this URL into your browser, **zeb.zebralovehost.com:2096**

Step 13: Copy and paste the verification code into the pop-up window, and click **Verify**.

Step 14: If the code is correct the window will automatically close. Now you have the ability to send emails using that email address. Now we need to set it up to check email from that account.

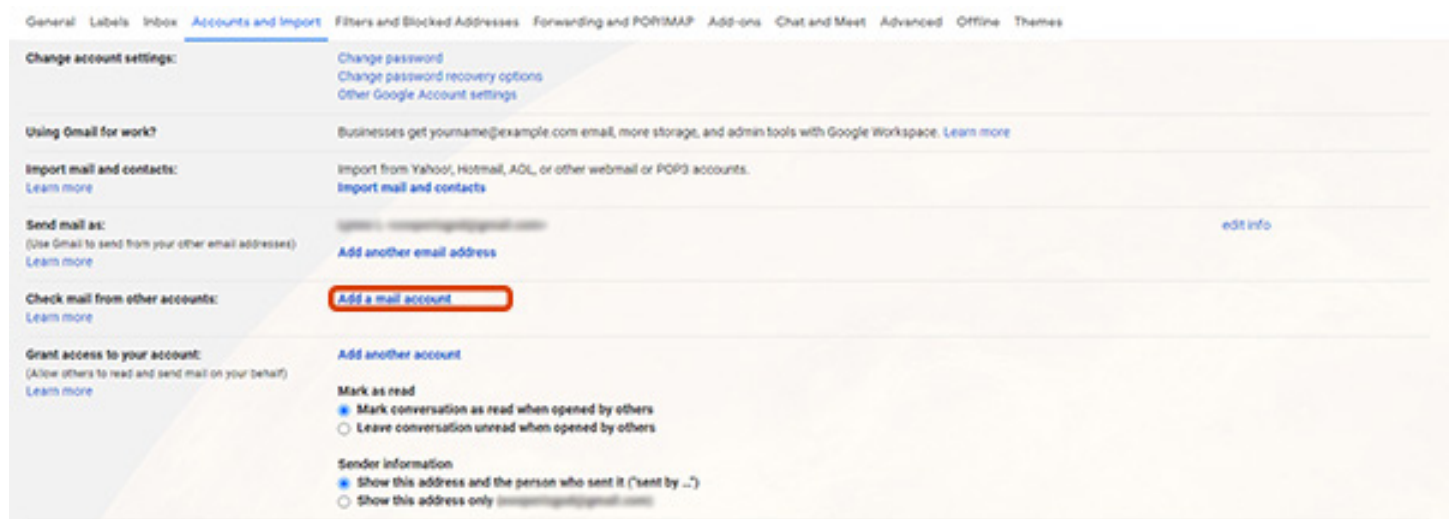

Checking Your Email With Gmail

Step 1: Open Settings

Step 2: Click on **See all settings**

Step 3: Click **Accounts and Import**

Step 4: Under the section labeled **Check mail from other accounts:** click **Add a mail account**

Step 5: Next enter your email address.

Step 6: Click **Next**

Add a mail account

Enter the email address you would like to add.

Email address:

Step 7: On the next screen it will default to **Import email from my other account**. Click **Next**

More about Gmailify.' There are two radio button options: 'Link accounts with Gmailify' (which is unselected and has a note 'Gmailify is not available for this provider.') and 'Import emails from my other account (POP3)' (which is selected). At the bottom are three buttons: 'Cancel', '<< Back', and 'Next >>'." data-bbox="58 69 478 342"/>

Step 8: Next you will be asked to fill out the following information with the correct information for your specific email address.

Username: youremail@yourdomainname.com

Password: your email account's password.

POP Server: zeb.zebralovehost.com

Port: 995

Leave unchecked: Leave a copy of retrieved message on the server.

Check: Always use a secure connection (SSL) when retrieving mail.

Check: Label incoming messages:

Leave unchecked: Archive incoming messages (Skip the Inbox)

Learn more'. The form fields are: 'Email address: info@zebralovewebsolutions.com', 'Username: info@zebralovewebsolutions.com', 'Password: [masked]', 'POP Server: zeb.zebralovehost.com', and 'Port: 110'. There are four checkboxes: 'Leave a copy of retrieved message on the server. [Learn more](#)' (unchecked), 'Always use a secure connection (SSL) when retrieving mail. [Learn more](#)' (checked), 'Label incoming messages: info@zebralovewebsolutions.com' (checked), and 'Archive incoming messages (Skip the Inbox)' (unchecked). At the bottom are three buttons: 'Cancel', '<< Back', and 'Add Account'." data-bbox="58 573 491 854"/>

Step 9: Click **Add Account**, your emails will now begin to show up in your Gmail inbox.
